April 20, 2018

Dear Sir or Madam:

It is with great pleasure that I write to you on behalf of Jacob Elkins. I have had the opportunity to get to know Jacob as a student in the Mobile Application Development major but also as an Honors Student and student leader.

Jacob is an individual whom is naturally curious and interested in learning and understanding how things work and interrelate. He is a pleasure to have in class and asks excellent questions and always makes positive contributions to discussions.

Jacob has proven himself a high achieving student whom is dedicated to maximizing his learning and thrives in applying what he has learned. Often time teachers only have an opportunity to know student in a lecture setting. I have had the opportunity to work much more closely with Jacob as his faculty mentor to his honors thesis. Jacob wrote and presented on Social Media; he presented his facts in a logical comprehensive way that delivered his message clearly and effectively.

Additionally, Jacob and I worked together in a destination course where Jacob and 9 other students visited companies in the Silicon Valley. Jacob participated in this course in a professional way, asked outstanding questions and learned about the cultural and historical influence of the Silicon Valley on the IT industry.

To enhance his classroom education Jacob sought out and secured a job with our Tech Center, in this capacity Jacob supervises a classroom and open access computer lab in one of our main academic buildings. Jacob ensures that all equipment is in good working order for faculty and student use.

Throughout the time that I have known Jacob he has grown into a motivated refined professional whom I believe will make positive contributions as a member of any staff.

Sincerely,

Deanna Gordon  
Professor; Applied Technology  
Curry College
